The Grand Jury charges that:

**GENERAL ALLEGATIONS**

At all times relevant to this Indictment:

**Requirements to Become a Registered Nurse or Licensed Practical Nurse**

1. The purpose of a professional nursing license was to protect the public from harm by setting minimum qualifications and competencies for safe entry-level practitioners. Nursing

was regulated because it is one of the health professions that poses a risk of harm to the public if practiced by someone who is unprepared and/or incompetent. Boards of Nursing achieved this mission by establishing the standards for safe nursing care and issuing licenses to practice nursing.

2. According to the National Council of State Boards of Nursing, components of licensure to be a Registered Nurse (RN) or a Licensed Practical/Vocational Nurse (LPN/VN) include verification of graduation from an approved pre-licensure nursing program, verification of successful completion of the National Council Licensure Examination (NCLEX) also known as “the board exam” or “the boards,” and in some states a criminal background check.

3. The Nurse Licensure Compact increased access to care while maintaining public protection at the state level. Under the Nurse Licensure Compact, nurses can practice in other Nurse Licensure Compact states, without having to obtain additional licenses. Approximately 39 states, including Florida, have enacted Nurse Licensure Compact legislation. The Nurse Licensure Compact required that every RN or LPN/VN graduate from a board-approved RN or LPN/VN prelicensure education program. Each state’s nursing board governed the approval of nursing education programs.

4. The State of Florida enacted the Nurse Practice Act to ensure that every nurse practicing in Florida meets minimum requirements for safe practice. Fla. Stat. §§ 464.001-464.027. The Florida Board of Nursing was both a regulatory board and a state government agency legally responsible for enforcing the state’s Nurse Practice Act. The Florida Board of Nursing was responsible for establishing standards for safe nursing care and issuing licenses to practice nursing. To do so, it oversaw education requirements and rules for licensure in Florida. Among these requirements was that any person desiring to be licensed as an RN or LPN/VN had to complete the requirements for graduation from an approved program, or its equivalent as determined by the

board, for the preparation of registered nurses or licensed practical nurses, whichever was applicable. For graduates of an approved program equivalent, an applicant seeking certification to take the licensure examination has to submit an official transcript or equivalent documentation which identified all courses completed that met graduation requirements.

5. According to Florida's Nurse Practice Act, an approved pre-licensure program's curriculum must consist of:

a. At least fifty percent clinical training for a practical nursing education program, an associate degree professional nursing program, or a professional diploma nursing education program.

b. The professional or practical nursing curriculum plan must document clinical experience and theoretical instruction in medical, surgical, obstetric, pediatric, and geriatric nursing. A professional nursing curriculum plan shall also document clinical experience and theoretical instruction in psychiatric nursing. Each curriculum plan must document clinical training experience in appropriate settings that include, but are not limited to, acute care, long-term care, and community settings.

c. The professional or practical nursing education program provides theoretical instruction and clinical application in personal, family, and community health concepts; nutrition; human growth and development throughout the life span; body structure and function; interpersonal relationship skills; mental health concepts; pharmacology and administration of medications; and legal aspects of practice. A professional nursing education program must also provide theoretical instruction and clinical application in interpersonal relationships and leadership skills; professional role and function; and health teaching and counseling skills.
